# Campus State Reporting

Accurate state reporting is critical to any district. Infinite Campus helps maximize district funding with built-in state and federal reporting functionality as part of the core student information system (SIS).

Benefits

Professional business analysts at Infinite Campus constantly monitor the ever-changing state and federal reporting requirements. They work closely with each state's Department of Education (DOE) and customers to ensure updates are included in a release prior to the end.

- Infinite Campus maintains state reports as data requirements change frequently. Early detection provides personnel with a better understanding of data-entry procedures so data accuracy and completeness is maintained over time.

- Current and historical information is kept in a highly normalized transaction database. To keep up with state accountability requirements, continuous enhancements are included at no additional cost.

- District data is synced to the Department of Education in real time, allowing for better tracking, easier modifications and timely state reporting submissions.

Key Functionality

- Pull data on student demographics, program participation, grade level, enrollment, course enrollment and completion, discipline, staff demographics and assignment/HQT status so it can be reported to state DOEs.

- Automate the state reporting process, utilizing the highly organized and securely accessible data stored in each district's single SQL database.

- Monitor data submission reports in real time to reduce the time spent reconciling and cleaning up data.
